We would like to take advantage of this occasion to inform all the authors that JISTEM Journal of Information Systems and Technology Management has implemented the DOI number. DOI - Digital Object Identifier is a numeric identification system for internet documents. It's a unique and exclusive number, attached to all and any text published on the web. It can be used with citation intention and article recovery in the on-line environment. Every article published in JISTEM, starting with the first issue in 2004, will receive a DOI number (www.doi.org) that you can find just below the title and author of the article. According to information from CNPq, Lattes Platform users will be able to include the DOI when filling out information about their scientific publications on Lattes. When the researcher enters this number, the Lattes Platform will access the DOI data-base and automatically fill in the title, year, issue, edition, page numbers and the name of the first author.

This second number of JISTEM issue 6 has articles of great interest for the community; among them, the 3 best papers presented in 6th. CONTECSI (June, 2009):

- *ERP implementations and their impact upon management accountants*, by Alan Sangster from the University of Middlesex Business School, London, Stewart A. Leech from the University of Melbourne, Australia and Severin Grabski from Michigan State University, USA;

- *Cultural influences on the adoption of project management: an analysis with students of Information Technology related courses*, by Carlos Ferreira da Rocha Neto and George Leal Jamil from FUMEC, Brazil and Maria Celeste de Vasconcelos from the Faculdade de Pedro Leopoldo, Brazil.

- *IT outsourcing and redefinition of the subsidiary role: a comparative study between the Brazilian and the Indian subsidiaries of an American multinational*, by Marco Aurélio da Silva, José Márcio de Castro and Aristides Rocha Araújo from PUC, Brazil and Roberto Gonzalez Duarte from UFMG, Brazil,

Other articles presented:

- *Information Technology Strategic Alignment: Analysis of Alignment models and proposals for Future Research*, by Fabrício Sobrosa Affeldt and Adolfo Alberto Vanti;

- *Factors of Influence on the entrepreneurial interest: an analysis with students of information technology related courses*, by Francisco José da Costa, Alexandre Araujo C. Soares and Diego Guilherme Bonfim;

- *A study of the perception of accounting and fiscal model users on an ERP system for the cargo and passenger road transport sector*, by Ivam R. Peleias, Napoleão V. Galegale, José Carlos Trevizoli and Pedro Luiz Cortes;

- *Information based metaphors: from the brain to network*, by Mateus Tavares da Silva Cozer, Edison Fernandes Pólo and Marcos Cortez Campomar.

The year of France in Brazil – In honor of the year of France in Brazil, the 6th CONTECSI, during its open session, promoted the panel: *Lês Systemes d'information comme Institutions, with the presence of renowned French Professors* Christophe Benavent, Eric Brousseau and Bernand Quinio. We published two articles from these renowned Professors in this edition: *Institutionalism and information systems: current state of the the art and position of French research*, by Bernard Quinio and Rolande Marciniak from the University of Paris Ouest Nanterre La Défense, France and *CRM as an institution - imaginary, legitimacy and appropriation*, by Christophe Benavent, from the University of Paris Ouest Nanterre La Défense, France.

Finally, as we traditionally do, we published the document with the 6th CONTECSI results - the International Conference on Information Systems and Technology Management organized by Professor Edson Luiz Riccio, Professor Marici Sakata, Master's degree student Renato Ferreira Leitão Azevedo and Professor Nelma Terezinha Zubek Valente.

We wish everyone a good reading.
